Remote Control Description

Note:

- a) To edit or adjust, press MENU on the remote control; or you can instead press button M on the frame for 3 seconds.
- b) To go back a step or go to the main menu, press EXIT on the remote control; or you can instead press button M on the frame.

Digital Photo Frame Introduction

Note: The MS Duo / MS PRO Duo need to use “MS Duo Adapter” to make the card easier to pull

Weather forecast module installation

1. Insert the jack of indoor sensor into the “Weather station” jack on photo frame. Make sure the indoor sensor is as far away as possible from the photo frame to avoid heat interference.
2. Put outdoor sensor in a sheltered and shaded position so as to protect it from direct exposure to sun and rain. The outdoor sensor has to be put upright in right direction, not horizontal. (Note: Please install batteries inside the outdoor sensor before usage, when leaving the outdoor sensor unused for a long period of time, please take out the batteries)

Quick Start

Step 1 Insert the jack of the DC adapter into the digital photo frame, then plug the DC adapter into a standard power outlet.

Step 2 Turn on the power, the pictures from the inserted memory card or internal memory will be displayed automatically.

Frequently Asked Questions

Q. Why can't the Digital Photo Frame play all images or movie files?

A: The Digital Photo Frame can support JPEG, MP3 and some video format depending on the product specification. It may not read some files downloaded from the internet.

Q. I have a memory card in the Digital Photo Frame, but it's not reading the card, what should I do?

A: First, make sure that you are using a memory card that is supported by the Digital Photo Frame. Second, ensure that the memory card is inserted all the way into the correct slot. Third, choose the correct card icon which you want to play.

Q. Why do some pictures load faster than others?

A: Higher resolution pictures usually load slower.

Q. Why doesn't it show both indoor and outdoor weather station data?

A: Make sure that the indoor sensor is inserted straight to the weather station jack.

Q. Why doesn't it show outdoor weather station data?

A: Firstly, make sure that you installed batteries well inside the outdoor sensor. Secondly, make sure that the battery inside the outdoor sensor is in right cathode and anode. Thirdly, check if the power status indication on digital photo frame is flickering, if so, please change the batteries inside the outdoor sensor.

This symbol on the product or in the instructions means that your electrical and electronic equipment should be disposed at the end of its life separately from your household waste. There are separate collection systems for recycling in the EU. For more information, please contact the local authority or your retailer where you purchased the product.
